RECIPIENT: University of Tennessee
STATE: TN

PROJECT TITLE: East Tennessee Initiative for Smart Energy Management (ETISE)

Funding Opportunity Announcement Number: DE-FOA-0002573
Procurement Instrument Number: DE-EE0010283
NEPA Control Number: GFO-0010283-001
CID Number: GO10283

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:
Description:

A9 Information gathering, analysis, and dissemination
Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

A11 Technical advice and assistance to organizations
Technical advice and planning assistance to international, national, state, and local organizations.

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide funding to the University of Tennessee (UT) to create the East Tennessee Initiative for Smart Energy Management (ETISE) which would promote the integration of smart manufacturing (SM) technologies for energy management into energy-related business practices. This would be accomplished through technical assistance and workforce training. The project would be completed over two Budget Periods (BPs) with a Go/No-Go decision point between each BP. This NEPA determination is applicable to both BPs.

ETISE would conduct a survey with manufacturers to understand the SM implementation for energy management by industries, identify opportunities and barriers of SM applications for energy management, and develop a regional model to promote smart manufacturing for energy efficiency, productivity, and emission reductions. ETISE would provide technical assistance, public workshops for awareness, and training sessions for relevant companies.

The Institute for a Secure and Sustainable Environment at the UT Conference Center would conduct analysis, preparation, and development of deliverables. The companies to receive technical assistance would be defined during the project. This would be limited to information gathering, data analysis, document preparation, and training. All project activities would be conducted from existing offices or computational facilities and use no materials beyond basic office supplies, software, and computer hardware. No physical product would be manufactured or fabricated and no field testing or modifications to any facilities would occur.

NEPA PROVISION

DOE has made a final NEPA determination.

Review completed by Shaina Aguilar on 12/23/22.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D,
Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
